

Association of Ukrainian Human Rights Monitors  
on Law Enforcement

# REPORT FOR 2016

## BACKGROUND

During 2005 – 2010 Ministry of Internal Affairs of Ukraine with the support of NGOs created three institutions important for public control over the activity of police and its compliance to the international standards in the sphere of human rights. Among such institutions were:

- Mobile groups on monitoring of special facilities of the Ministry of Internal Affairs (temporary detention centers, rooms for delivered, reception centers for children) as a prototype of the national preventive mechanism against tortures (since 2004);
- Civil council on human rights observance under the Ministry of Internal Affairs and its regional departments (since 2005);
- Department for monitoring of human rights observance in the activity of law enforcement authorities (UMDPL) (since 2008). UMDPL was a unique unit for Ukraine, which from 2008 to 2010 exercised functions of a police ombudsman.

After the Ukrainian government changed in March 2010, attitude of the Ministry of Internal Affairs to the human rights observance changed radically. One of the first decisions of the new Minister of Internal Affairs was to disband the Department for monitoring of human rights observance which staff were fired shortly after in contradiction to all provisions of labor legislation.

As a response, activists of human rights organizations together with the staff of the disbanded Department decided to form a specialized sector of civil control over the law enforcement authorities. The main “motor” of this process was the new Ukrainian NGO “Association of Ukrainian monitors of human rights observance in law enforcement” created in June 2010 by former staff members of the mentioned Department.

It was only for the first year and a half of its existence Association UMDPL established the work in the sphere of public control of law enforcement officers – got the support of a wide range partner human rights organizations, formed the list of volunteers who were trained on the topic of monitoring the work of different police units, conducted a series of periodic campaigns around Ukraine on police monitoring results of which were presented to the public and submitted to the Ministry of Internal Affairs of Ukraine. Besides that, Association develops other spheres of work concerning public control: running public investigations of the cases of human rights violations by law enforcement officers, making awareness raising campaigns on cooperation of police with citizens among journalists, NGO activists, students etc., making expert evaluation of legal documents regulating the activity of law enforcement authorities and other in this sphere.

As of the end of 2012 National Preventive Mechanism (NPM) against tortures started working in Ukraine according to the “Ombudsman+” model. It was created on the basis of the Secretariat of the Ukrainian Parliament Commissioner for Human Rights. NPM was created according to the ratified by Ukraine Optional Protocol to the UN Convention against tortures and other cruel treatment. Through making regular visits to places of detention the mechanism has to prevent tortures of persons detained there. Within the framework of NPM activity, Association UMDPL takes part in the preparation of public monitors who together with other members of monitoring groups conduct visits to places of detention subordinated to the Ministry of internal Affairs and State Penitentiary Service as well as coordinates the work of this monitors. Members and volunteers of Association also always take part in such visits. Thus, the work within the framework of the National Preventive Mechanism became one of the priority spheres of Association UMDPL work.

Traditional became a police monitoring campaign «Police under Control» which aims to detect existing drawbacks in the activity of the National Police. Besides that, the Association UMDPL regularly conducts monitoring of territorial institutions of the National Police of Ukraine on observance of the right to access public information. Results of conducted campaigns are discussed at press-conferences,

round tables and other events to which representatives of respective agencies, mass media and civil activists are invited. Each year the network of monitors expands which allows to increase effectiveness of evaluation of police work in the regions as well as to raise the level of public control over police activity.

A standard sphere of organization’s activity is conduction of legal awareness raising and training events. Their aim is to increase the level of legal education and awareness among population through dissemination of informational and educational materials as well as conducting educational events of different types. With this aim workshops «You and Police», trainings «Police under Control» etc. are held on regular basis. Besides that, Association UMDPL developed a mobile application «Police under Control» which can be downloaded free of charge to any smartphone to always have available at hand a practical advice on how to behave with police in this or that situation in life.

The Association UMDPL takes an active part in reforming police: starting from participation in the work of attestation and police commissions, writing analytical materials on the topic of reforming police to regulatory activity both on the legislative and on the level of institutional decrees.

Within the scope of activity of a working group on reforming law enforcement authorities of the Reanimation Package of Reforms (RPR) which the Association UMDPL is a member of, elaborated was a number of draft laws in the sphere of reform the law enforcement authorities' activity.

In particular, in 2016 a group of People's Deputies submitted amendments to the draft law «On Disciplinary Statute of the National Police of Ukraine» that were elaborated with participation of experts of the Association UMDPL.

## ACTIVITY OF ASSOCIATION UMDPL DURING 2016

### Development of the system of monitoring activity of law enforcement authorities

#### Conducting All-Ukrainian monitoring campaigns

Association UMDPL continues conducting civil campaigns on monitoring activity of law enforcement authorities. Their aim is to detect strengths and weaknesses in the work of new police, draw the attention of the public, National Police of Ukraine and the Ministry of Internal Affairs to the problems with human rights observance by law enforcement officers and facilitate the improvement of situation.

During five months (from May to September) continued the campaign on monitoring police units. Observations of activists with their own impressions and results of such inspections were published at the website of the Association.

Monitoring of territorial departments of the National Police of Ukraine on observance of the right to access public information was also being conducted during a year. Apart from systematic monitoring of official websites of the National Police of Ukraine and its territorial units, as well as the quality of processing informational requests, experts of the Association UMDPL in cooperation with

the Secretariat of the Ukrainian Parliament Commissioner for Human Rights conducted visits to the Directorate Generals of the National Police in Ivano-Frankivsk, Odessa and Chernihiv regions and some of their territorial units. Based on the results of such visits recommendations were prepared to eliminate detected violations and integrate best practices with the aim of proper observance of a right to access public information. These recommendations, which besides specific violations contained answers to typical violations and problems, detected by the monitoring of the Directorate Generals in regions of Ukraine, were sent to the heads of Directorate Generals of the National Police in respective regions as well as to the leadership of the National Police of Ukraine.

On 19 October in Kharkiv a press-conference was organized dedicated to the results of local police monitoring. According to evaluations of monitors it received only 3,1 of 5 points possible.

Besides monitoring campaigns the activity of Association UMDPL was also focused on a problem of existence of «cages» in the premises of metropolitan police units designated to detain people, which is a direct violation of human rights. After a series of appeals and informational requests conducted by the activists we managed to attain a full dismantlement of the mentioned grids.
